WORK EXPERIENCE

Amazon, Inc. | UX Designer

November 2021 - Present

Led the evolution of the Seller Central support experience (1M+ sellers) from complex workflows and dashboards toward **conversational AI assistants** — with work that:

- (Seller-facing) Defined a new AI-native troubleshooting and contact-support experience. Partnered with a UX researcher to validate the concept before, during, and after launch, discovering essential migration gaps that drove improvements and adoption — **beating the no-harm goal with 1.1K contacts eliminated**.
- (Seller-facing) Designed 5+ AI-assisted features embedded in existing workflow pages to help sellers clarify intent and self-troubleshoot — eliminating 21K+ weekly manual contacts and **~\$8.7M in annualized operational savings**.
- (Associate-facing) Designed a conversational case-handling vision that cuts associate time and effort, **securing STLT-level buy-in** and prioritization; drove key experience definition with science and engineering toward human-readable, actionable output.
- Synthesized usability findings, usage data, and stakeholder feedback into insights that steered product roadmaps (~\$3.3M in annual savings).
- Drove adoption of AI prototyping & design skills, equipping 10+ PMs and SDEs to ship simple features under review — cutting handoff from days to hours.

ADP, Inc. | UX Designer

July 2018 - October 2021

Designed dashboards and complex data tables for enterprise practitioners to manage time tracking, pay calculation, corrections, payroll processing, and benefits — contributing to up to **20% reduction** in support calls for measured features.

ADDITIONAL EXPERIENCE

Founder & Creator | Fashion & Consumer Insight

October 2021 - Present

Built a personal fashion channel helping everyday consumers find quality clothing at reasonable prices, growing to **48K+ followers** by identifying content-market fit through underserved niches — validating and iterating through video metrics, scaling reach via organic growth and ad campaign management.

EDUCATION

Georgia Institute of Technology

Human Computer Interaction, M.S.

Aug. 2016 - May 2018

Sichuan University

Industrial Design, B.E.

Sept. 2010 - June 2015

SKILLS

AI Prototyping & Tooling

Builder.io, VScode, Kiro, Claude design, Figma AI, Claude Code, HTML, CSS, JavaScript

Design

Figma, Axure, Sketch, Adobe suites, Design Systems, Information Architecture

Research

Behavioral analytics, User journey mapping, Usability testing, User Persona, Data-informed decision making

AI & Emerging Tech

Agentic interaction patterns · Conversational UX · Human-in-the-Loop (HITL) · Building trust with AI

Video production & editing

After Effects, Final Cut Pro, SeeDance, Kling AI
